UI/UX DESIGNER | PRODUCT DESIGN | WEB APPLICATIONS

PROFILE

UI/UX and frontend designer with experience designing digital products, mapping user journeys, creating wireframes and interfaces in Figma, and collaborating on web implementation. Combines a Computer Science background with hands-on accessibility evaluation, stakeholder communication, and customer-facing problem solving. Interested in simplifying complex SaaS workflows through thoughtful, usable, and technically feasible design.

DESIGN & TECHNICAL SKILLS

UX & product: User flows, information architecture, wireframes, interactive prototypes, responsive UI design, interface evaluation, accessibility audits, design documentation, stakeholder collaboration

Tools & development: Figma, Adobe Photoshop, Illustrator, HTML, CSS, JavaScript, React, Git, Python; Microsoft 365; Claude AI-assisted product workflows

RELEVANT EXPERIENCE

Junior UI/UX & Frontend Designer | Homecierge | Remote | Jun 2025–May 2026

- Designed wireframes, user flows, and frontend interfaces for a home-services marketplace connecting users through profiles, job requests, quotes, and reviews.
- Translated product requirements into clear application experiences, balancing user needs with frontend implementation considerations.
- Worked with collaborators to refine interface behavior, investigate usability issues, and improve responsive web experiences.
- Used Figma and frontend technologies to support iterative product design and implementation; incorporated Claude AI into development workflows.

Web Accessibility Assistant | University of Lethbridge | Lethbridge, AB | Aug 2023–Present

- Evaluate websites and digital experiences for accessibility and usability barriers, documenting findings and opportunities for improvement.
- Collaborate with technical teams to clarify interface issues and support more inclusive, consistent user experiences.
- Apply a structured review process to identify problems, explain user impact, and communicate actionable recommendations.

Retail Sales Representative | TELUS | Lethbridge, AB | Jun 2024–Present

- Identify customer needs, explain technology options, and guide users through complex product and service decisions.
- Troubleshoot device and service issues while maintaining accurate records and coordinating follow-up through internal systems.
- Ranked #1 in-store for sales for two consecutive years and among the top 20 in the region.

Desk Support | University of Lethbridge Library | Lethbridge, AB | Sep 2023–Apr 2026

- Supported students and staff with computer, software, equipment, and library-system issues in a service-oriented campus environment.
- Maintained accurate records and explained technical information to users with varied experience levels.

SELECTED DESIGN WORK

GymBuds | UX/UI Product Design
Figma | Mobile App Design | User Experience

- Designed a mobile fitness application concept focused on helping users connect with compatible workout partners and improve their fitness experience.
- Developed user flows, wireframes, and high-fidelity interface designs to create intuitive navigation and simplify key user interactions.
- Applied user-centred design principles to organize features, improve usability, and maintain visual consistency across the application.
-

IJEỌMA — E-commerce Experience Concept

- Developed an editorial commerce experience with structured product discovery, category navigation, collection storytelling, and product-detail flows.
- Defined information architecture across Shop All, Women, Men, and Collections to support clear navigation and a consistent shopping journey.

EDUCATION

Bachelor of Science in Computer Science | Minor in New Media & Marketing

University of Lethbridge | Expected December 2026 | GPA: 3.47/4.00
